About Me

Hi! I'm Naveen E, **web development** currently in my second year of pursuing a Bachelor's degree in Computer Applications (BCA) at Madras University. I've always been fascinated by technology and its potential to solve real-world problems, which is what led me to pursue a degree in this field.

Through my studies, I've gained a solid foundation in programming languages like Python, Java, C++ , as well as in key topics such as algorithms, data structures, and web development. As I continue to dive deeper into these subjects, I've found myself particularly drawn to web development, database management, and I'm constantly exploring ways to turn theory into practice by working on hands-on projects.

Outside of my academic work, I'm passionate about continuing to learn new technologies and techniques, whether it's through online resources, coding challenges, or simply experimenting with new tools. I enjoy working on projects that push my boundaries and help me grow as a developer

Education

10th -CBSE

12TH commerce- CBSE

Madras university - BCA(2nd year)

Skills

- Java
- .net
- c#
- Python
- SQL
- c
- java
- c++
- Java script

Projects

- [E Cart website](#)
- [Cloud Security IBM](#)
- [IBM chatbot](#)
- [College Portal](#)
